

Kingborough Council Strategic Plan

Strategic Outcome 1.4

A Council that acknowledges the existence of a climate change and biodiversity emergency and has in place strategies to respond

Net Zero Emissions

- Implement programs to incrementally reduce council's greenhouse emissions towards it's committed target of Net Zero Emissions for council activities by 2035
 - **2022/2023 Actions:**
 - Identify milestones projected to 2035 for key emissions sources and incorporate them into a Greenhouse Action Plan
 - Develop and implement methodologies for energy and greenhouse monitoring and reporting for key council emission sources

Climate Change Adaptation Planning and Research

- Undertake climate change adaptation planning and research projects focusing on key community case study sites
 - **2022/2023 Action**
 - Undertake the Snug Climate Change Adaptation Project and develop a framework for future action

Coastal Hazards Program

- Continue the implement a Kingborough Coastal Hazards Program
 - **2022/2023 Actions**
 - Implement the Regional Coastal Hazards Strategy and develop a Kingborough Coastal Hazards Strategy and Policy
 - Progress the Kingborough Council Coastal Asset Management and prioritisation initiative

Kingborough Council Climate Change Plan

- Implement actions within the Kingborough Council Climate Change Plan and ensure that it accords with contemporary requirements and opportunities
 - **2022/2023 Actions**
 - Undertake a status inventory of actions within the Plan and report on outcomes
 - Update the Plan for a further 5 year timeframe and seek Council endorsement
