

STORMWATER RUNOFF FROM BUILDINGS

Stormwater collected by buildings and hardstand areas such as carparks and driveways must be discharged in accordance with Council requirements.

A nuisance caused by the discharge of stormwater onto adjoining land from roofs or water tanks not connected to stormwater drainage lines, can attract penalties under the Building Act 2016.

Some stormwater collection and disposal methods, such as the installation of underground stormwater drainage pipes, require a plumbing approval prior to installation.

To find out more about your responsibilities regarding the collection and disposal of stormwater on your property please contact our Building and Plumbing Services Team on (03) 6211 8200 or kc@kingborough.tas.gov.au
