

ARE YOU CONSIDERING BUILDING A RETAINING WALL ON YOUR PROPERTY?

To check the approval requirements for your retaining wall we recommend the following:

- 1** Have a site plan and elevation plan drawn of the proposed retaining wall showing the following detail:
 - a) location of the retaining wall on the property;
 - b) height of the retaining wall;
 - c) setback distance in metres of the retaining wall from the property boundary;
 - d) material that the retaining wall will be constructed from; and
 - e) method of construction.

- 2** Provide a copy of the plans to Council and ask whether the proposed retaining wall requires planning, plumbing or building approval.
- 3** Council will advise you of any statutory approval requirements for your retaining wall.
